

# myTaxExpress

## How to update myTaxExpress software to its latest version?

There are **two ways** to update myTaxExpress to latest version on **Windows**, choose **either one**.

1) Please run the myTaxExpress update program as shown from this picture

OR

2) Another way to update software is simply re-download the latest software version from our website, and re-install.

No un-installation first, just reinstall. Also remember close running mytaxexpress before reinstall. The existing license key and prepared return files will still work.

### for MacOS, the process of update mytaxexpress is

- 1 remove old version under Applications
- 2 download new version from our website and move under Applications
- 3 New software will pick up existing license key and data return files.
